Document 2: Microbial Ecology Health and Disease, (March 2002), Vol. 14, No. 1, pp. 4-13

Document 3: JP 2003-12537 A (Kyusai Kabushiki Kaisha) January 15, 2003 (Family: none)

Document 4: JP 2002-204669 A (Kabushiki Kaisha Toyo Shin'yaku) July 23, 2002 (Family: none)

Documents 1-4 were cited in the international search report.

In addition to the above, the following document is newly cited in this international preliminary examination report.

Document 5: JP 63-14680 A (Fujicco Co., Ltd.) January 21, 1988 (Family: none)

Documents 1 and 5 above describe producing a food product by pulverizing lotus root and performing lactic acid fermentation thereupon, and therefore the inventions of claims 1 and 4-6 lack novelty and an inventive step.

In the preparation of food products, it was conventional practice before the filing of this application to dry ingredients at -30°C to 70°C and to perform processing at a temperature higher than 100°C , and therefore, such practice can be applied as needed by persons skilled in the art when performing lactic acid fermentation of lotus root. Moreover, this examination finds no statement in the Description of a critical effect provided by performing processing at those temperatures. Therefore, based on the descriptions in documents 1 and 5 the inventions of claims 2 and 3 are obvious to persons skilled in the art. As a result, the inventions of claims 2 and 3 lack an inventive step.

Documents 1-5 above do not describe the invention of claim 7, and this examination finds that the matter described therein is not obvious. Therefore, the invention of claim 7 is novel and involves an inventive step.
